Turtle Mountain Construction Update

Wesbild now has an 80+ person crew hard at work on their Turtle Mountain project.

Nearing it's completion, their water resevoir had its last concrete pour on October 6 and is now ready for commissioning of the tanks. The pump station is also nearing completion and will begin water system testing in the coming days. The crew is also focused on installing shallow utilities, street lights and curb/gutter up the new Turtle Mountain Boulevard.

Off-site crews are nearing completion on the newly improved Alexis Park Drive and 39th Avenue intersection.
